Occupational divers in New Zealand must undergo a full diving medical examination every five years, or as determined by the Diving Medical Consultant (DMC). The full diving medical examination must be carried out by a Designated Diving Doctor (DDD) at www.worksafe.govt.nz/worksafe/notifications-forms/registrations/occupational-diving/designated-diving-doctors.

The completed medical examination results, any tests and this questionnaire must be forwarded along with the $97.00 processing fee (within 28 days) to Diving and Hyperbaric Medical Services at divemeds@gmail.com or www.divemeds.co.nz. If deemed unfit to dive, the DMC will request further evaluation by an appropriate medical specialist.

During the interim four-year period, an Occupational Diver Medical Assessment Questionnaire must be completed annually by the diver. This questionnaire is part of the medical assessment of fitness for occupational diving. It is regarded as an acceptable assessment by WorkSafe New Zealand for medical clearance of occupational divers provided a full medical examination is completed every five years (or as determined by the DMC). This meets the requirement of AS/NZS 2299 Part 1 2007 as well as the Health and Safety in Employment Regulations (regulation 49).

You are now able to complete this questionnaire, scan and upload your full medical examination and tests if required and make payment online at www.divemeds.co.nz.

Alternatively, the full medical, questionnaire and any tests need to be scanned and emailed as a PDF file to divemeds@gmail.com. The $97.00 processing fee will then need to be paid by direct credit; Diving and Hyperbaric Medical Services, Westpac, 03 0104 014 682 000.

If the applicant is deemed fit to dive, a medical clearance will be issued to the diver via email. Most assessments will be processed within 10 working days unless further investigations are required. Any queries about this process should be emailed to divemeds@gmail.com.

The full medical must be completed in the year of application for a certificate of competency, or renewal of a certificate of competency. A medical clearance (within the last six months) will be required at the time of applying for a certificate of competency.

Where a diver suffers an accident, illness, a change of medication, or any medical circumstance which is likely to affect their medical fitness to dive, a new full medical assessment must be completed prior to recommencing work.

Diving Hyperbaric Medical Services may also consider an appropriate medical clearance obtained overseas as part of this process. This should be discussed directly with Diving Hyperbaric Medical Services by email to divemeds@gmail.com.
