Public warning in case of major incident

General information about how the public will be warned in the event of a major incident at the facility:

Norske Skog Tasman Ltd has a dedicated Emergency Rescue and Security (ERS) department that monitors this facility 24/7.

There is a site wide and local community alarm system which operates large sirens and flashing lights at key points. ~~This is supported by emergency generators and fail safe systems.~~

~~At the ERS control room are procedures for the correct escalation of events of a major incident nature.~~

Public actions in case of major incident

General information about how the public should act and any precautionary steps that people should take if a major incident occurs at the facility:

~~The facility is remote, which should have little effect on the local community.~~

~~The facility is secure and gate access cards are needed to gain access to the area of the plant or operations.~~

Members of the public are requested not to approach the facility and are advised to co-operate with any instructions or requests from the emergency services, including ERS.
